

## ELECTROMAGNETIC BALLASTS

INTRODUCING A NEW RANGE OF ELECTROMAGNETIC BALLASTS.

DNA UK LTD are aware of the availability of Electromagnetic Ballasts. To help with supply of replacements, we have teamed with a leading ballast manufacturer in Central Europe.

The full range includes:

- Standard ballasts for HS, HI and HM lamps from 220V, 50Hz to 415V, 50Hz
- Multi-voltage ballasts for HS and Hi lamps
- Ballasts for power reduction
- Control gear units series KIT for HS and HI lamps 70-400W
- Control gear units (pulse version) series KIT for HS lamps
- Control gear units (box version) for HS, HI lamps
- Encapsulated ballasts for HS, HI and HM lamps

We can also offer an electronic ballast option for HS lamps. The benefits of this ballast are listed below.

- Replaces all conventional components related to the lamp: electromagnetic ballast, igniter and power factor correction capacitor
- Lamp power stabilization in full voltage range, longer lamp life
- Controlled inrush current
- Voltage range 220-240V, 50-60Hz
- Low harmonic distortion
- Works with high pressure sodium lamps

Normal delivery will be approximately weeks from receipt of your orders.

Please contact the office for full details of these products.
